How To - JAVA for 1 Click Desktop share (Firefox)

To enable Desktop Share to function you must add an exception to your JAVA security settings. It is advisable to have your JAVA updated to the latest version

How To:

- 1. For the first threat analysis line graph:
 - a. From the start menu, navigate to Start > All Programs > Java > Configure Java
 - b. Select the 'Security' tab -

🛃 Java Control Panel				
General Update Java Security Advanced				
☑ Enable Java content in the browser				
Security level for applications not on the Exception Site list				
© <u>V</u> ery High				
Only Java applications identified by a certificate from a trusted authority are allowed to run, and only if the certificate can be verified as not revoked.				
e High				
Java applications identified by a certificate from a trusted authority are allowed to run, even if the revocation status of the certificate cannot be verified.				
Exception Site List Applications launched from the sites listed below will be allowed to run after the appropriate security				
prompts.
