Penetration Testing

Did you know...

$3.35 million is the average cost of a data breach for a company in Australia*****

What are 'Pen Tests'?

A penetration test, or 'pen test', is an authorised hacking attempt targeting an organisation's IT infrastructure, network, and web applications in order to identify and exploit vulnerabilities.

- OSCP, CREST, & OSWA Certifications.
- Optimised Project Delivery.
- Discover Vulnerabilities.
- Complimentary Remediation Scan.
- In-Depth Executive Report.
- Aligned to International Frameworks.

CREST | OFFENSIVE OSCP | OSWA

Web Applications

Involves an analysis leveraging both OWASP and WASC initiatives to identify vulnerabilities and technical flaws.

Infrastructure

Utilises the strengths from both OWASP & OSSTMM methodologies to ensure a complete approach to testing.

Wireless Network

Testing of the wireless network to identify any weaknesses that may be available to unauthorised users and guests.

Mobile Applications

Performed utilising a combination of industry leading commercial and custom in-house developed tools.

Contact our sales team today to **receive a complimentary evaluation** of your testing needs.
